Effect of Repeated Washing on Skin Health: Assessments of the abrasive effects (visible skin redness) and impact on skin barrier function (TEWL - Trans Epidermal Water Loss) of Solopol® GFX™ and a common Gojo heavy duty hand cleanser were made using a repeated forearm washing test method over a five day period. The results showed a significantly higher increase of TEWL and visible redness for the common Gojo heavy duty hand cleanser in comparison to Solopol® GFX™. Overall, the results conclude that repeated use of Solopol® GFX™ resulted in maintenance of a normal skin condition whereas repeated use of the common Gojo heavy duty hand cleanser resulted in strained skin.

EFFICACY TESTS

Cleaning Efficacy Test:

Using a standard oil/grease/carbon black based soiling, the cleaning efficacy of Solopol® GFX™ was compared to three of the most commonly used heavy duty hand cleansers in the US. Testing using human volunteers shows that the cleaning efficacy of one 2.8ml shot of Solopol® GFX™ outperforms up to 6.0ml of all three competitor products (Graphic 3).

User Preference Test:

Solopol® GFX™ was tested by more than 200 users at 24 different test sites. Professions included car repair, body and maintenance, HVAC, lawn and garden, automation, transportation, manufacturing of metal and auto components. Users confirmed the exceptional cleaning power and mildness of Solopol® GFX™ in comparison to common heavy duty hand cleansers used before (Graphic 4).
