# Floor Protection for All Furniture Types

**Durable, easy to install Expanded Technologies protection products**

**Preserve Floors | Reduce Chair Noise | Move Furniture Easily**

*Your First Line of Defense!*

## Floor Protection for All Furniture Types

### Sled base chairs

#### **Wrap-Around® Floor Savers®**

Wrap-Around® Floor Savers® provide floor protection for chairs with sled bases. Easy to apply, they attach to themselves for a longer lasting, improved hold, and conform to glides or rails to achieve a perfect fit.

### Metal legs with swivel glides

#### **Slip-Over® Floor Savers®**

Slip-Over® Floor Savers® protect hard floor surfaces from damage. The Slip-Over® consists of a reinforced felt bottom and a vinyl sleevelet that encases the existing chair or table glide. The sleevelet is designed to fit snugly around an existing glide and to stay on tightly, without adhesive.

### Metal legs without swivel glides

#### **Replacement Chair Tips**

Replacement Chair Tips reduce noise and protect all types of floors. Simply slide the Chair Tip over the chair leg to prevent floor damage and to reduce noise associated with moving chairs. Chair Tips stay put without adhesive. They are durable and last longer than standard felt protective pads.

### Wood legs

#### **Clear Sleeve™ Floor Protectors**

Clear Sleeve™ Floor Protectors prevent damage normally caused by moving furniture. The transparent, flexible sleeve securely forms to the size and shape of chair or table legs, eliminating the need for adhesive. The cushioned felt tip lasts longer than standard felt pads, dampens noise and distributes weight evenly for better furniture wear.

### Slip-On® Floor Savers®

Our tough Slip-On consists of a vinyl sleeve with a reinforced rounded felt bottom. Simply slide Slip-On Floor Savers over chair and table legs to prevent floor damage and to reduce furniture noise.

### Office chairs

#### **CasterTire™ Floor Savers®**

Convert damaging hard plastic casters into soft, quiet, floor saving wheels. Made of soft, non-marking vinyl, they fit over most caster wheels.

### Uniquely shaped wood legs

#### **VersaGlide™ Formed Felt**

A dynamic felt tip combined with a tap-in base that can be used on any wooden chair leg. Durable and easy to install, all you need to do is nail in, peel the release liner, and place the felt tip on the base.

### Doors

#### **Gripper® Doorstops**

Made of sturdy industrial vinyl, the Gripper® Doorstops is perfect for anyone who needs to prop doors open quickly, easily and securely. Its non-slip bottom will protect and grip any surface. The Gripper® Doorstops' durable patent pending design ensures that even with heavy use, its performance will not slip.

## CASE STUDY

# Floor Savers® Make a Difference

## How Union Grove Union High School Kept the Peace (and Quiet)

A newly remodeled STEM (Science Technology Engineering and Math) classroom was a source of pride for Union Grove Union High School, in Union Grove, Wisc. That is, until they noticed the brand new flooring was being torn up by the tables and chairs.

### Union Grove Cost Savings:

Approximately \$6 per square foot annually

### Floor Maintenance Was Too Frequent

Eight coats of wax weren't enough to protect the floors. "It took just two months for the students to go through the wax and begin scratching the floors," says Kurt Jorgensen, director of operations for the school. Refinishing the floors more often wasn't a viable option, especially for the budget conscious school. Floor refinishing is a time consuming, labor intensive process that is always completed over breaks and holidays, because it is so disruptive to student schedules.

An Internet search for a solution led Jorgensen to Expanded Technologies. Bret Bushey, vice president of sales for Expanded Technologies, evaluated the situation and recommended CasterTire™ Floor Savers®, for the chairs. CasterTires convert damaging hard plastic casters into soft, quiet, floor-saving wheels.

Ever since, things just haven't been the same.

### CasterTires Reduce Wear and Noise

"We installed the CasterTires at the beginning of December and after two months it's hard to see any wear to the floor," notes Jorgensen. But it wasn't just Jorgensen who was pleased with the casters; the teachers also noticed a big difference. Suddenly, there was much less noise to contend with in the classroom. "The teachers are as happy as could be about it," Jorgensen adds. "By cushioning the rollers with the CasterTires, the rooms are much quieter."

"Without the CasterTires, we would have had to re-wax the floor two to three, maybe four times during the school year," cautions Jorgensen. "Now, when you roll the chairs, there is no grinding. They have a bit of cushion and roll easily."

### Slip-Over™ Floor Savers® for the Cafeteria

Success in the STEM lab led Jorgensen to call upon Expanded Technologies to help with a similar problem in the school cafeteria. With thousands of students visiting the cafeteria every day, there was constant noise and excessive wear to the floor.

"Without the CasterTires, we would have had to re-wax the floor two to three, maybe four times during the school year."

BEFORE

AFTER

For the fix, Expanded Technologies installed Slip-Over™ Floor Savers® to protect the floor from damage. The Slip-Over consists of a reinforced felt bottom and a vinyl sleeve that encases the existing chair or table glide.

"We put the Slip-Over Floor Savers on the chairs, and the difference was night and day," says Jorgensen. "I am very happy with the products."

### Installation is Easy

Working with Expanded Technologies has been a positive experience for Jorgensen. "Bret Bushey showed me the products and how to install the CasterTires and Slip-Overs. He took measurements and set me up with a distributor I was already using. Everything worked out great," adds Jorgensen.

Now that he knows what Expanded Technologies can do, Jorgensen is looking at other solutions for cabinets and desk pads.

"It is amazing how these small products can make such a huge difference."

With Floor Savers®

Without Floor Savers®

Vinyl

### Tests by Velocity Consulting prove the effectiveness of our products

Without Floor Savers®, wear is evident after only one hour in the testing machine

Expanded Technologies products were shown to reduce noise by an average of 40%. Multiply those reductions by an entire classroom full of chairs, and the difference is significant.

**Proven  
to Kill 99.9%  
of Tested  
Pathogens**

# Antimicrobial Felt

## Recommended Surface Type

Wood

Ceramic Tile

VCT (Vinyl) tile  
and linoleum

LVT

Expanded Technologies has developed the first ever antimicrobial felt for floor protection, available as a premium upgrade for all of our Floor Savers®, Floor Protectors, replacement chair tips, Formed Felt, and heavy duty felt pad products. The felt was tested by the American Association of Textile Chemists and the International Antimicrobial Council Technology Center and found to kill 99.9% of the pathogens it comes in contact with.

### Use Antimicrobial Felt to

- Actively fight the spread of germs on floors
- Protect floors from scratches and dents
- Reduce noise
- Guard against rust stains
- Help prevent furniture joints from loosening

### Recommended for

Vinyl, LVT, wood, tile, marble flooring, and all hard flooring types
