Double Duty Neutral Cleaner

This low pH, all-purpose cleaner removes the dirt but not the shine! The formula gives maximum dilution- excellent for use in autoscrubbers or damp mopping.

DILUTION RATIOS:

General Cleaning...12oz per gal of water	Stripper Residue.....2oz per gallon
Wet Mopping, Auto Scrubber..2oz per gal	Salt/Ice Melt Residue....4oz per gallon

4 gallons/case 5-gallon pail 55-gallon drum

For use on all surfaces not harmed by water. This product contains no perfume or butyl cellosolve. Food equipment and surfaces should be rinsed after cleaning.

Toro D Cleaner/Degreaser

Toro-D's strong performance makes it our top-selling cleaner. This non-butyl formula cuts through grease and oil fast, works for top-scrubbing, and can be used in an autoscrubber when properly diluted. Controlled foam makes rinsing easy, and its odor counteractant leaves a fresh finish. Effective on grease, oil, soot, carbon, ink, wax, food spills, rubber burns, algae, mildew stains, and more.

DILUTION RATIOS:

General Cleaning...1 part Toro to 8-10 parts water	
Wet Mopping.....1 part to 40-80 parts water	High Pressure Washing....1 part to 40-80 parts water
Auto scrubber.....1 part to 40-80 parts water	

4 gallons/case 5-gallon pail 55-gallon drum

For use on all surfaces not harmed by water. This product contains no perfume or butyl cellosolve. Food equipment and other surfaces should be rinsed after cleaning.

Crystal Clear Glass Cleaner

An outstanding all-around cleaner that is ideal for use on glass and mirrors. Good for all general purposes! Ready-to-use, no mixing or diluting needed. Simply spray and wipe clean!

4 gallons/case 5-gallon pail 55-gallon drum

HORIZON

Products

Prefer Ultra High-Speed Floor

From Prefer's excellent initial gloss to the long-term durability, you will agree it's the best! Gives a wet shine day in and day out! Provides a durable coating with superior resistance to dirt penetration, scuffing and black heel marks. Prefer can be burnished, spray buffed or left alone. It contains 22% solids and covers approx 2,000 sq ft per gallon.

4 gallons/case 5-gallon pail 55-gallon drum

Directions: Strip all old finish from the floor. Rinse and allow to dry. Apply 4-5 coats of Prefer with a clean synthetic mop, allowing the floor to dry between coats.

Maintenance: Dust mop with untreated mop or sweep daily. Mop or autoscrub as necessary with a neutral floor cleaner (Double Duty). Burnish to maintain a 'wet look' appearance.

Break Up Floor Stripper

This stripper has no harsh odors and removes the hardest coatings! Breakup is purple in color and has an almond fragrance. Use to remove floor wax (carnauba), finishes (acrylic, styrene, polymers, copolymers, oligomers, metal cross-linked) and sealers (acrylic, water-based urethane).

Available in 4 gallons/case, 5 gallon pail and 55 gallon drum

Directions: WEAR GLOVES AND STRIPPING BOOTS WHEN APPLYING. STRIP ONLY A MANAGEABLE AREA AT A TIME. Dilute with warm water as follows:

NORMAL: 1part to 5 parts water HEAVY BUILD-UP: 1 part to 1 part water

AUTOMATIC SCRUBBER: 1 part to 10 parts water

Apply liberally to the floor- leave the surface VERY WET. Allow to remain on the floor for 5-10 minutes. Agitate for 100% removal. Pick up solution with a wet vac. If any finish remains (like around the baseboard) re-apply stripping solution and agitate. Allow the floor to dry completely. No rinsing is necessary if surface appears to be dust-free after drying. **Although this is a fast-evaporating, rinse-free stripper, many tile manufacturers recommend rinsing all stripping solutions.
